Suspected COVID-19 Case Definition
(Epidemiological link Supplement)
Last Update: 02 Mar 2020

For precautions, suspected cases of COVID-19 include: those who presented with the identified clinical pictures * AND a history of travelling in the 14 days prior of onset of symptoms to the following areas with presumed ongoing community transmission of COVID-19:

1. China  
2. Iran  
3. South Korea  
4. Japan  
5. Singapore  
6. France  
7. Italy  
8. Germany  
9. India  
10. Malaysia  
11. Lebanon  
12. Pakistan  
13. Azerbaijan  
14. Afghanistan  
15. Iraq  
16. Egypt  
17. Algeria

The listed countries will be updated (in this same document) according to the ongoing risk assessment.

*Please Refer to: COVID-19 Guidelines for more information on the suspected case definition

Preventive measures for passengers arriving from countries where the new Coronavirus COVID-19 poses a threat

**Before and during the flight**
- Pre-screening of all passengers before boarding the plane
- The usage of masks and medical latex gloves by the aircrew

**Upon arrival**
- Training of the flight crews on how to deal with suspected cases during the flight using decontamination tools, perform isolation procedures, and provide the necessary reports upon the aircraft arrival
- The passage of all passengers through the health checkpoint area and through the mandatory thermal camera equipment path for the safety of all travelers
- After all the passengers disembark, the plane shall be sterilized and disinfected
- The presence of health practitioners and medical teams in all of the Kingdom's airports to take the necessary precautions
- When a suspected case is detected, a safe path for transferring the case is then activated
